. . .

8.2.1. Appropriate engineering controls Provide adequate ventilation. Use explosion-proof electrical/ ventilating/ lighting/ equipment. Observe any occupational exposure limits for the product or ingredients.

8.2.2. Personal protection equipment	
Eye Protection	Wear eye protection with side protection (EN166). The following protection should be worn: Chemical splash goggles.
Skin protection	Wear appropriate clothing to prevent any possibility of skin contact. Wear protective clothing and gloves: Impervious gloves (EN 374). Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. Gloves should be changed regularly to avoid permeation problems. Wear solvent-resistant apron and boots.
Respiratory protection	Normally no personal respiratory protection is necessary. Wear a suitable respirator if the ventilation is not sufficient to keep the solvent vapour concentration below the occupational limit values.
Thermal hazards	None known.
Hygiene measures 8.2.3. Environmental Exposure Controls	Wash hands at the end of each work shift and before eating, smoking and using the toilet. Wash promptly with soap and water if skin becomes contaminated. Promptly remove any clothing that becomes contaminated. Wash contaminated clothing before reuse. Use appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke.
